WASHINGTON, Dec. 8. - Radical changes in the income tax to reach visions and to improve the machinery of collection were suggested to Congress to-day in the annual report of Secretary Mc. as means by which the greater part of the additional revenue needed to pay for the Administration national defense plans can be provided. The Secretary proposed to lower the exemption limits so as to tax married persons with incomes as low as \$3,000 and single persons with \$2,000 incomes. The exemptions now are \$4,000 and

\$3,000, respectively.

Increases in the collection force, requirement that returns must be income, and a change so that the tax shall not be withheld at the source were among Mr. McAdoo's other suggestions. He made no estimate of the of persons who might be taxed if the amendments were adopted nor the amount that might be expected, but in connection with his ra quest for a larger collection force he pointed out that examination of the past personal and corporation re-turns showed that 63 per cent. of inspected disclosed that additional tax was due the Government. On the balls of the examinations, the Secretary says that apparently than \$4,000,000 in personal tax and more than \$20,891,000 in corpora-tion tax still is due the Government

foul breath, backache, rheumatic stiffmens, or have a sour, gassy stomach after meels, are used to get a quarter pound of limestone phosphate from the drug store, and begin practicing internal sanitation. This will cost very little, but is sufficient to make anyone an enthusiast on the subject. Remember inside bathing is more important than outside bathing, because the skin pores do not absorb impurities into the blood, causing poor health, while the bowel pores do. Just as soap and hot water cleanses, sweetens and freshens the skin, so hot water and limestone phosphate act on the stomach, liver, kidneys and towels.—Advt.

I visited the French and British fronts along the Serbo-Bulgarian frontier Friday night and Saturday. The mountainous hills were topped with batteries. The big British guns were sending shells screaming eight miles across hills a mile high. The holly hills shook with the dull roar.

The Bulgars broke over the hills at intervals in wild charges, screaming ike demons. Through the Balkan wars they were hailed as the champions of the bayonet. But in sudden collision with French Zouaves they met their match. In three distinct encounters they were caught by French cold steel, stabbed to death or sent flying back over the hills, targets for machine guns and shrapnel.

"On both sides of the Vardar River our troops have continued the pursuit of the French, who are retreating. A column advancing north of Monaştir across the Smeleve toward the road from Monastir to Resna defeated the Serbians after severe fighting at Bigla Mountain and occupied the town of Resna.
"A column advancing north of Monastir from Kicheve to Ochrida captured, after bitter resistance, strongly fortified positions near the villages of Medove and Miranmorac, and is now marching toward Ochrida. A column advancing from Kicheve toward Dibra, after a sanguinary battle, defeated the Serbians at the watershed which follows the ridges of the Jama Mountains and toward noon occupied Dibra, from which place they are pursuing the enemy in the direction of Struga.
